RATION.

Above all the topics that have been wor threadbare by the press of Vancouver Island. the exploration of the colony certainly stands pre-eminent. For the last four years the subject has been dinned into Legislative and Executive ears, until the public has come to the conclusion that both these branches o Government have been afflicted with that in curable deafness which is said to attack thos who are not disposed to hear. Whether the land speculators in the House were afraid that a proper exploration of the Island might by unfolding a greater area of agricultural land, reduce the value of those thousands o acres held in their hands unproductive; or whether the Hudson's Bay Company had got some of their numerous traps for catching those rather valuable animals—the wild lands of the colony-hidden in the interior, we cannot say; but certes a most determine stand was taken to have the interior rigidly tabooed. The late Governor alluded in almost every one of his opening speeches to the desirability of having the Island explored .-The estimates were sent down with an exploration item of \$3,000; but the Assembly generally managed to mix it up with the road appropriation, so that the ill-used non-producers would have high-ways
or rather bye-ways that "started from made through their densely crowded but sparsely populated sections of land. The Executive did not seem exceedingly enthusiastic in the matter, and perhaps was quite satisfied, if not indeed highly pleased, that no definite action was taken on the question. A small spasmodic effort was made last year to penetrate a portion of the interior, but it could scarcely be called an "exploration \$2,500 have been voted this year, but the sum is totally inefficient to effect anything We have now come to the sixth year of the Island's civilized existence,-a period during which small men have become great, and "straw" men wealthy,-but the knowledge of our small territory of 18,750 square hiles is but very little increased since Vancouver eighted the place over eighty years ago. No wonder His Excellency Governor Kennedy, a few days since, was compelled to acknowledge this condition of things to be disgraceful. We can, indeed, scarcely imagine that any population boasting of Angle Saxon energy and adventure could have sat quietly down in a corner of this small Island, satisfied tha it had accomplished glory enough by putting up a number of brick and wooden houses on a pleasant and picturesque site. We must confess that our neignbors across the Straits would have shown more enterprise in this matter, and would have been led, if fir no other object than to satisfy Yankee inquisitiveness, to explore the country, so as to

The offer, however, which His Excellency makes, places this much neglected question on a very different footing from that which it formerly held. Exploration is no longer to be left to the tender mercies of the House of Assembly, whose members have garotted the force robbed it of the amount intended for its special use. No more luke warmness is to be exhibited by the Executive on this important matter. His Excellency shows that 25 Octaves Pale French Brandy his speeches are not to be taken as mere formalities, but that when he says a thing he means it. He desires to see the Island explored : and knowing the wretched, dawd ling policy of the Assembly, he at once assumes the responsibility of applying a portion of the Crown Lind revenue to that object. According to his remarks on Wednesday last, published in the Colonist. he is willing to co-operate with the people in this matter, and contribute a sum equal to double the amount raised by public cription. This offer, coupled w desire to have the scheme projected and car ried out by the people, evinces a liberality of disposition, and a soundness of judgment, which the public at large will no doubt show they appreciate, by maturing a proper system of exploration at once. The season is auspicious, whether we look at it in an astronomical or business point of view, a dall it equires is a free expression of public opinion on the question, that will leave no room for COMMISSION MERCHANTS, 3 cs cavilling afterwards. This is a matter which every man in the colony should feel interested; the public money, as well as ininterested; the public money, as well as individual contributions is involved and any partial or confined expression of public sen timent should be earnestly deprecated.

The money required to carry out a proper scheme of exploration, will not fall far short of \$8000. This amount would give us three exploring parties or three months, properly equipped and provisioned. The smaller ese parties can be formed consistent with officiency the better. Large prospecting parties are both cumbrous and difficult to provide for, and have been the great mis takes in other countries. Here, of course, the risks and hardships of exploration are reduced to a minimum. There is no want of water, wherever the traveller directs his foot steps. There is no part of the Island in which he need be over 30 miles from the sea coast; and gime is to be found, no doubt, throughout its length and breadth. There will be no want of volunteers there fore for the expedition; but is will require a very careful and julicious selection to get hold of men qualified in every respect for the undertaking. Whether, however, the public ed for Parlor use. will be able to raise suffici at funds to earry
out a properly organised scheme, a few days

OW LANDING and will be offered in a few
days an invoice of Superior will, no doubt, discover. In the meantime, we would arge on every property-holder in the place the necessity of contributing his ntmost to a project that will more than any other undertaking give stability to the place TOTHE SPORTING MEN OF VICTORIA

ARRIVAL FROM THE NORTH.

From Captain Coffin of the schooner Nanime Packet, which atrived yesterday from a trading expedition up the const, we have the following particulars. At Stekin there were seven miners waiting at the mouth of the river fot the opening of the season; they would probably start up about the beginning of April, and expected to do well this season. The stamer Labouchere left Fort Simpson about 26th March, bound up to Taka in the Russian possessions. The schooner Largley had passed up to Kittimat; spoke the Missionary schooner Carolena, in Grenville Channel, all well. Left the sloops Petrel. Farle and the Red Rover trading in the results of the shops Petrel. Farle and the Red Rover trading in the results of the stamer Labouchers? Left the sloops Petrel, Eagle, and the Red Rover trading in the dians from various tribes had collected to-gether in Fizhugh Sound for the purpose of gether in Fizhugh Sound for the purpose of fishing and gathering fisht-spann. The sloop Kingfasher left Fort Rupert lourteen days ago for Victoria; she has been four months out. The Indians at the Fort told Captain Coffin that they had had a fight with the Lummi Indians in which several of the latter were killed, and they had brought home five heads cut from the bodies of the Lummis slain, as trophies, and one young klootchman as a slave. Capt. Coffin reports having experienced very bad weather

to the friends of the missing men to know that every effort has been made ro find them. Different reports, without any apparent foundation, have been in circulation within the last day o two. One is that Roberts was the last day o two. One is that Roberts was killed by the two men who accompanied him for the sake of the money which he is known to have had with him; and the other, that the party had been surprised and murdered by Indians for plunder, their bodies leaded and thrown into the sea and the boat sent adrift brown into the sca and the boat scat the bottom up to create an impression that the men had been drowned. The first report has no appearance of credibility, as the two men would of course require the boat to effect their escape. The other, past exerience their escape. The othe has rendered too probable.

Cricket Club.—A number of gentlement interested in the noble game of cricket have associated together and formed a ciub under the name of the "United Victoria Cricket Club." The first general meeting of the club is advertised to be held at the Fashion Hotel on Saturday evening next, at 8 o'clock, to receive the report of the committee appointed to draw up a code of rules. His Excellency the Governor will be requested to allow a timself to be named patron of the club.

Ever greens were also tastefully atranged in from greens were also tastefully arranged in fro or many of the principal stores. Or Vetal meaning great excitement was manifested by all classes, and much speculation ensued as to the hour when Mr. Seymour would arrive. At last intelligence was brought that the gunboat was in sight; a great crowd rushed lown to the wharf, and remained there in orselves at the end of the season.

The other items of mining news have been anticipated.

Mr. H. Nelson's pack train of 31 beeves reached the creek on the 12th, and Floyd's pack train got in on the 14th.

The snow, which lay over three feet on the ground. was commencing to thaw. Water was much needed on the creek.

Mr. G. B. Wright was suffering from severe indisposition at the Mouth of Quesnelle.

The following, compiled from the Columbian of Saturday, contains some additional intelligence:

Business rather dull as yet and little change in prices. The stock of goods is ample, x-capt in the article of gum boots, which were scarce, but a supply was met on the way. There are a very large number of claims preparing for work, and several in operation. A number of the rich paying claims of last.

His Excellency replied as follows :

SIE,—I have received with great satisfac-faction the address you have been good enough to present to me on behalf of the in-habitants of the city and district of New Vestminster.
I accept with gratitude the promise of the

co-operation of the gentlemen you represent in my efforts to advance the welfare of the community,
I assume the Government of British Columbia with a full knowledge of the import

lumbia with a full knowledge of the importance of the trust committed to me. I shall, however, conscientiously do my duty, and hope for the blessing of the Almighty.

He then thanked the volunteers (who mustered strong on this occasion), and embarked again for his residence, which is situated in the camp. On Thursday, the tolling of the fire bell, and the lively strains of the bugle, summoned the "Hyacks" and the volunteers, and, in fuct, all the town to assemble, preparatory to starting for the earny, to escort the Governor down to town. The city graudmothers, as they are popular y termed nere, were very conspicuous in the procession, not from any difference where the strong with which he has been intended to be a summon of the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been intended to suggest the strong with which he has been the strong with which he appearance of dignity, but from their scarred for appearance; two of them have been lately engaged in the manly art of self-defence, and a third is a professor in the same art. However revenous a nous moutens they, that is the procession brought the G vee nor down and perched him up in front of the Trea ury, where, by the way, he had an excellent view of the rank, fastion and beauty of New Westminster collected in Webster's store, just opposite, where windows, doors and parapets were lined, not with a sea, but with a row of eager faces, all seemingly preposessed in favor of the manly looking Colonial Secretary.

Some of the more favored of the ladies were seated, immediately behold the Governor, which place also the Legislative Council had pre-empted. The Governor was supported on one side by Mr. Begbie, and by Pellew

BUCKEYE MOWER. TO FARMERS:

WE, WITH GREAT CONFIDENCE, offer the Buckeye Machine for this reas n: Knowing it to be superior to any Mower for sale, and that it will sustain the reputation it has made for the past three years in surpassing any other Mower in the following respects:

Being better Made; much Stronger and more Durable; will Run Lighter; Cut much closer with greater ease to the team, and no side draught. We can bring twenty Fartners to say the HUCK-EYE is SUPERICHE on any Mower, to one who can be found prejudiced against iv. The Buckeye Mowers are of two sizes, cutting 4 feet, and 4 feet 8 inches.

The "Buckeye" as a Reaper. The important advantages which belong to the BUCKEYE as a mower are retained in the Reaper, and can be used either as a Mower or Reaper by attaching the Platform and Reel.

Though importing largely of them, we have been unable, for two years, to supply the demand.

They are better adapted to the wants of California Farmers than any Jombined Machine for sale. It will adapt itself to every surface of ground, will run lighter and deliver its grain easier and better than any other Reaper. The Resper's seat is directly over the axie of the Machine, it stead of being on the Platform, where adds greatly to the draught.
